---

## PROJECT/S

**ShadyShop**([Video](#)) - Shady Shop is a MERN Stack Ecommerce application featuring a sleek UI, robust backend powered by Express and MongoDB and seamless integration with PayPal for checkout. Users can browse, search, and purchase products, while admins have full control over user management and product listings. You can also visit the [Github link](#).

**Axiomcast**([Live](#)) - Developed within 1 week, my Village88 capstone project revolutionizes teamwork with advanced virtual collaboration tools. Featuring crystal-clear video conferencing and interactive screen sharing, it's powered by Vite, Next.js, Typescript, TailwindCSS, Shadcn UI, Clerk Auth and Stream API. Check the [Github link](#).

**ProDash**([Video](#)) - Product Dashboard is a CodeIgniter web app for managing products, user registrations, and reviews. Features include user profiles, admin product management, and robust form validations, with data stored in MySQL. Just visit the [Github link](#) to setup.

---

## EDUCATION
